

Engineers Australia - Australian Engineering Week Discover Engineering Careers Seminar

Northern River school students have an opportunity to learn about engineering careers during Engineers Australia's Engineering Week activities commencing Tuesday 3rd August through to Thursday 5th August 2010.

Engineers Australia Newcastle Division President, Mr Paul Reynolds, said, "Many school students may not be aware of the exciting opportunities engineering careers offer in providing and maintaining the infrastructure needed by our community. The ***Discover Engineering*** seminar provides an opportunity to learn about engineering careers and how students can enter the engineering profession."

The ***Discover Engineering*** seminars include presentations from both current engineering students and experienced engineers. Several state government agencies and local companies will have information on their engineering cadetships and traineeships available at the seminars. Following the presentations, there will be an opportunity to ask questions of local engineers over light refreshments.

Discover Engineering will be held at the following locations throughout the Northern Rivers region:

Coffs Harbour - Tuesday 3 August – 5.30pm to 7.30pm
Southern Cross University, Upper D Block Lecture Theatre, Coffs Harbour
Education Campus

Grafton - Wednesday 4 August - 6.00pm to 8.00pm
South Grafton Services Club, Wharf Street, South Grafton

Alstonville - Thursday 5 August, 6.00pm to 8.00pm
McCarthy Hall (adjacent to Catholic Church), Main Street, Alstonville

"I would encourage all students who are considering a challenging but rewarding career to attend," Mr Reynolds concluded.

Engineers Australia acknowledges and thanks the Northern Rivers committee members for their assistance in promoting the Discover Engineering seminars.
